4 MHz. Offset Fox Hunt Attenuator

Ideal for the Fox Hunt Loop and Arrow II Antennas

This could very well be the best Offset Attenuator ever made. It uses a 4 MHz sine wave instead of a square wave used in most Offset Attenuators. This reduces the interference from pagers and other radio services.

All metal case for better shielding. Very Important for using with a null type antenna, such as the Fox Hunt Loop.

Weighs just 2 1/2 Oz. Size is 1 1/2" by 3 1/2" including the connectors.

3 Volt Lithium Battery - CR2032
Battery Life is over 100 Hours.

Instructions

Pull out the clear plastic tab before the first use.
Tune your Receiver 4 MHz above the sought frequency.
Rotate the knob clockwise to turn on the attenuator & increase the attenuation. Turn off when not in use.

It's just that Simple.

Warning:

Transmitting may damage the unit.

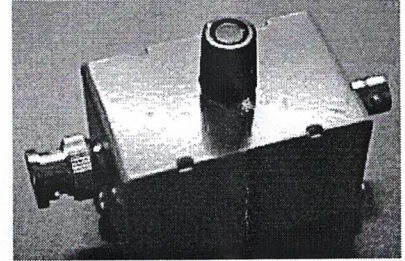

Built by Reed Electronics

Guarantee

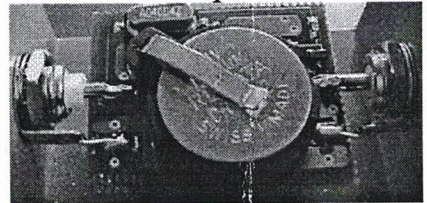

No hassle refund

If you are not completely satisfied with any ARROW ANTENNA Product it can be returned for a FULL refund less shipping and handling within 90 DAYS of purchase date.
